

The superb new range of HighVolt Ignition Leads is the most comprehensive available to the UK and European aftermarket. All manufactured in-house, using the latest laser and CAD technology, ensuring the highest degree of quality for every HighVolt ignition lead produced.

Kerr Nelson is proud to present the new HighVolt catalogue to our customers. Kerr Nelson's ongoing commitment to the requirements of our customers can be seen in our new extensive range with over 800 OEF sets ensuring HighVolt remains the No.1 Ignition Lead range available to the European aftermarket.

Computer Aided Technology

## HighVolt Facts:

- HighVolt Ignition Leads are manufactured using the latest laser computer aided technology available in the manufacture of all our ignition leads.
- All materials used conform to ISO International specifications:  
ISO 3808/1, ISO 3808/2, ISO 6856  
and European Legislation CEE/72-245.
- Ignition systems have become increasingly complex. HighVolt's Research and Development Department is committed to ensure that our database and technical information remains the most comprehensive and up-to-date available to our customers.
- As modern technology develops it is increasingly important to fit the right ignition leads to your vehicle. Should inferior leads, or the wrong set, be fitted this could result in damage to the engine management system or catalytic converter, costing both time and money. This is one reason we believe HighVolt is the market leader, our unrivalled Knowledge and Experience in the manufacture of ignition leads gives you, the customer, peace of mind knowing HighVolt is the ultimate choice for quality and performance.
- Service, availability and technical support remains our priority to enable our customers to enjoy the HighVolt ignition lead range. We have high levels of finished stock to enable us to offer guaranteed next day delivery, anywhere in mainland UK on stock orders received before 3.30pm backed up with a V.O.R service.
- Our Technical Department support line is available during office hours should the need arise, to help with any technical advice you require or provide solutions to vehicles not covered in our impressive range.

Kerr Nelson will replace or repair any genuine HighVolt lead set or single lead free of charge within the guarantee period stated on each product, subject to the following conditions:

- The lead purchaser will immediately upon discovery of any defect, return it to an authorised Kerr Nelson distributor or stockist with the receipt, date of purchase and a description of the fault.
- The lead has not been damaged by negligence, incorrect fitting or incorrect removal.
- The lead has not been tampered with or modified without written consent from Kerr Nelson.

This does not affect your statutory rights. Kerr Nelson does not accept liability for towing, recovery, re-delivery costs, or for loss consequent upon failure of our leads.

## The Ultimate Choice for Quality & Performance

Conforms to ISO International specifications  
ISO 3808/1, ISO 3808/2, ISO 6856 and European Legislation CEE/72-245.

### Original Equipment Fit (OEF)

With more than 800 part numbers the OEF range represents the most comprehensive range of OE fit sets available to the UK and European aftermarket. Designed to meet or exceed OE performance standards, the range is manufactured in full silicone and copper core in 7mm and 8mm cable. In addition, HighVolt offers in our new and extensive catalogue the most comprehensive range of 5mm OE fit sets to cover the ever growing Japanese and Korean market.

### Universal Fit sets (HUS)

15 x 8mm semi-tailored sets, HighVolt universal sets cover approximately 90% of the aftermarket including Ford, Vauxhall and Rover.

### Universal Single Leads

23 part numbers manufactured in 8mm silicone cable, complete with a display stand and header board.

A level of service which exceeds customer expectations, with 24-hour delivery from stock, backed up with a next day VOR service and full Technical Support Hotline.

... HighVolt leads the way.
